

Customer Story

Medical Weight Loss Utah

Medical Weight Loss Utah offers permanent weight loss solutions. This clinic resolves in working with each patient's unique needs, through careful understanding and observation.

Implementing an innovative physiological approach, Medical Weight Loss Utah knows that there is no basic solution in losing weight. Everything needs to be observed with a trained and watchful eye - only then can the clinic work with a patient in attaining a proper and manageable weight goal.

Challenge

Medical Weight Loss Utah wanted to reach out to more people online. Even though they had a website, they were in need of a way to properly market and engage with both current and new clients. Additionally, no solid call to action had been integrated by the brand. More importantly as well, the clinic preferred to work with a local partner.

Solution

Growth99 created a new website for Medical Weight Loss Utah. A social media strategy has also been integrated, complete with reputation and customer engagement approaches.

Implementation of the new call to action resulted in new customers for Medical Weight Loss Utah as well.
